**Reason why I want to work in Japan:** There are so many reasons why I want to work in Japan. First of all my all-time wish and plan is to always walk and be into the latest technology from this side I would say there is no other country that is as good as Japan. In Japan, innovative technologies and ideas are changing the way people live, and contributing to the world. As an engineer working in a country which is advanced in every way possible in technology is undoubtedly a great choice for them. They have huge and well-oriented IT companies to work for. So for me, it will be a very pleasure if I will get a chance to work in Japan.
