| Career Objective

An exceptionally creative individual with a BSc degree in Computer Science & Engineer and 1 year+ professional experience in full-stack software development. Seeking a challenging position as a Software Engineer at Japan to utilize my programming and designing skills for software program development with object-oriented products, testing and quality management to meet the clients' specifications and gain professional experience alongside.

| Reasons why I want to work in Japan

There are so many reasons why I want to work in Japan. Firstly, my all-time wish and plan is to always walk and be into the latest technology and from this side, I would say there is no other country that is as good as Japan. In Japan, innovative technologies and ideas are changing the way people live, and contributing to the world. As an engineer working in a country which is advanced in every way possible in technology is undoubtedly a great choice for me. They have huge and well-oriented IT companies to work for. So for me, it will be a very pleasure if I will get a chance to work in Japan.

Also for the reason of many employee benefits in Japan, like most Japanese companies offer:

- Many learning opportunities & training with a comfortable workspace.
- Good allowances.
- Lifetime employment.
- Social Security.
- Healthcare and Insurance.
- Holidays and Annual Leave.
- Maternity and Paternity Leave.
- Sickness Leave.
- Pensions: Mandatory and Typically Provided.

Those are also the reasons why I want to work in japan.
