radwanromy.github.io/Japanese-Portfolio | Inagi City, Tokyo, Japan

SKILLS

Languages : Java, Python, C, C++, C#, Dart, PHP, TypeScript, Solidity, JavaScript, Bash, Batch, Ruby, Go, CAPL
Frameworks : Spring Boot, Django, Angular, CodeIgniter, Web3.js, Servlet/JSP, Flutter, TensorFlow, ReactJS, Ruby on Rails
Tools : Git, Github, Docker, CI/CD pipelines, AWS EC2/S3, ADB, Truffle, MetaMask, Ganache, Tortoise, VectorCAN, Android Studio, Anaconda, Jupyter Notebook, SourceTree, Rancher, VectorCAN, CanFD, Kvaser, Virtual Machine, Claude CLI
Databases : Oracle, MySQL, PostgreSQL, PL/SQL (Procedure, View, Function), MS SQL Server

EXPERIENCE

Sogo System Research LTD.

Software Engineer - Mid-Level

Aug. 2023 – Present

Tokyo, Japan

- Delivered full-stack development for enterprise clients including Mazda, Sumitomo Electric, and Japan Nuclear Fuel Limited (JNFL) as a dispatched engineer, with project teams ranging from solo to 30 engineers.
- Built a vehicle telematics (DCM) test environment from scratch for Mazda; CAPL/Vector CANoe optimizations cut processing time 30% and automated test scripts cut testing effort 50%, with real-time monitoring added via AWS CloudWatch.
- Took over Japan-side development of a PostgreSQL accounting system for Sumitomo Electric that had been fully dependent on an offshore team, owning it end-to-end from requirements through testing.
- Designed approximately 35 REST APIs and 30 reusable frontend components (React + Spring Boot + MySQL) for a JNFL facility-management system with multi-stage approval workflows.
- Integrate Claude Code into development workflows and deploy serverless solutions using AWS Lambda to accelerate delivery.

MotivationWorks LTD.

Senior Software Programmer

Dec. 2022 – Mar. 2023

Remote (Bangladesh)

- Implemented backend features in PHP (CodeIgniter) running in Docker on AWS EC2.
- Used GitHub and JIRA for version control, code review and task tracking with distributed teams.

Era InfoTech Ltd.

Full-Stack Software Engineer

Oct. 2021 – Feb. 2022

Dhaka, Bangladesh

- Built banking modules with Spring Boot, Angular 13, Hibernate and Oracle for enterprise systems.
- Developed REST APIs and worked on SWIFT processing and application security testing.

American International University-Bangladesh (AIUB)

Teaching Assistant (Computer Science)

May 2021 – Sept. 2021

Dhaka, Bangladesh

- Supported Computer Graphics and Web Technology labs, grading and exam preparation.
- Explained core programming concepts using C++, OpenGL, PHP, JavaScript, HTML and CSS.

PROJECTS

Professional Projects

- GENNEN**: SpringBoot + React + MySQL + Testing backlog system.
- GHAS**: Java + PostgreSQL backend tools, Comprehensive Testing.
- IC Debug**: C/Python scripts for embedded IC debugging, validation.
- Mazda Dev**: DCM and CAN-FD infrastructure via Bash/Batch, AWS.
- Admin Panel**: Java (JSP) admin Database MySQL, Unit-Testing.
- JP SchoolSys**: CodeIgniter + AWS Japanese school system.
- LockerSys**: Spring Boot + Angular locker management app.
- FundXfer**: Django + Oracle fraud-safe fund transfer workflows.

Academic & Personal Projects

- Risei App**: Flutter/Dart multipurpose cross-platform mobile app.
- FaceID AI**: Siamese NN one-shot face recognition in TensorFlow.
- HE Chain**: Ethereum + Paillier blockchain for medical records.
- Web3 dApp**: Solidity + React + MetaMask decentralized app.
- TourSys**: PHP/MySQL tour booking platform.
- 3D Site**: Three.js WebGL interactive portfolio.
- VillageSim**: C++/OpenGL animated village scene.

EDUCATION

American International University-Bangladesh

B.Sc. in Computer Science & Engineering (CGPA: 3.70/4.00) [Academic Coursework Completed: Sept. 2021] Dhaka, Bangladesh

2018 – 2022

CERTIFICATIONS

- Bangladesh-Japan ICT Engineers Training Program (B-JET) Univ. of Miyazaki & North South Univ. (2022).
- Mobile App Development ICT Division, Bangladesh (2020).
- Programming Assessment Bangladesh Computer Council (2021).

ACHIEVEMENTS

1) The Duke of Edinburgh's International Award Gold Badge (2021). 2) B-JET: 100% attendance; 2nd in tech presentation; 6th in Japanese video contest. 3) VR Fest 2018: 4th place, Game Dev Challenge (AIUB). 4) HackerRank: Gold badges in Java, SQL and Python.

LANGUAGES

English (Fluent), Bengali (Native), Japanese (Conversational), Hindi (Conversational)

JLPT N2 Preparing to retake.
